DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, and 17-23, drawn to systems and methods for processing a transaction using an IC card classified in class 705, subclass 39.
 - II. Claims 15 and 16, drawn to an IC card from which information identifying specific processors and accounts is read, classified in class 705, subclass 41.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility as a computerized arrangement for transferring funds by debiting one account and crediting another, and invention II has separate utility such as a smart card having a user operated arrangement for programming the card having a value carrying memory prior to use, with details of the desired transaction. See MPEP § 806.05(d).

Art Unit: 3694

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
